

## To Whom it may concern

Top to Top expedition

The Swiss Alpine Club SAC is the most important mountaineering club of Switzerland with almost 110'000 members. Its core activities are responsible mountaineering as well as protection of the alpine environment. The SAC is concerned about the deep changes induced by the human-induced climate changes, which affect the mountain areas worldwide in a most dramatic way.

Complete information on our goals and activities can be gained from our website [www.sac-cas.ch](http://www.sac-cas.ch).

The Swiss Alpine Club SAC fully supports the concept and ideals as well the ongoing realisation of the "Top To Top" expedition by Dario and Sabine Schwörer. We admire the courage and idealism of the couple and their focus on the children and youth of the world, whom they want to bring more knowledge, motivation and encouragement for an engagement for a better World.

We therefore ask individuals, firms, organisations as well as local authorities and governments in all the countries visited by the "Top to Top" expedition for support of Dario und Sabine Schwörer to reach their goals.

Best regards  
Swiss Alpine Club SAC

Dr. Jürg Meyer  
Director of environmental department

Pit Meyer  
Director of marketing
